

# Kingborough

LOCAL GOVERNMENT AREA

Health is closely tied to our daily environment. This Community Health Check presents information about the environmental, social and economic state of the Kingborough local government area.

## Community Health Check 2025

# About us

	Kingborough LGA	Tasmania
Our population	50,082	557,571
Aboriginal population	 4%	 5.4%
Population by age		
Population by gender	48% Male 52% Female	51% Male 49% Female
Median age in years	45	42
Born outside Australia	 25%	 21%

Sources: Our population, Aboriginal population, Population by age, Population by gender, Born outside Australia, Median age in years: Australian Bureau of Statistics, 2021 Census All persons QuickStats, Local Government Areas, Kingborough

# Social and economic conditions

## Education

The proportion of people in the Kingborough LGA who have completed Year 12 and above is greater than the proportion for Tasmania overall.

PER CENT OF ELIGIBLE POPULATION WHO HAVE COMPLETED YEAR 12 AND ABOVE

Higher education levels are associated with better health outcomes.

## Unemployment rates

The rate of people in the Kingborough LGA who are unemployed is less than in Tasmania overall.

## Median weekly income

Weekly income per household is higher in the Kingborough LGA than in the rest of Tasmania.

## Motor vehicles

Ninety-six per cent (96%) of households in the Kingborough LGA have one or more motor vehicles.

## Home ownership

More people own their own homes outright in the Kingborough LGA compared to the rest of Tasmania.

	Kingborough	Tasmania
Owned outright	40%	37%
Owned with mortgage	37%	33%
Rented	20%	26%

# Healthy living

## Self-reported health

Forty-one per cent (41%) of Kingborough residents rated their health as “excellent” or “very good”. This is higher than the rate for Tasmania.

### ADULTS REPORTING THEIR OWN HEALTH AS ‘EXCELLENT’ OR ‘VERY GOOD’

How people feel about their own health, their state of mind and their life in general is a common measure of health. (Australia's Health 2018. AIHW)

## Risk factors

Risk factors are conditions or behaviours that make it more likely people will get a chronic condition or health problem.

	Kingborough	Tasmania
 Overweight/obese body mass index (BMI)	52%	62%
 Current smoker	12%	15%
 Daily/occasional vaping	3%	3%
 Single occasion risky drinking (>4 alcoholic standard drinks)*	40%	37%
 Insufficient moderate/vigorous activity <sup>†</sup>	25%	24%
 Did not meet recommended daily vegetable intake <sup>^</sup>	90%	91%
 Did not meet recommended daily fruit intake <sup>^</sup>	62%	61%

In the Kingborough LGA, around 12% of people aged 18 years and over, are daily and current smokers, which is lower than the rate for Tasmania.

# Healthy living

## Psychological distress

Fewer adults in the Kingborough LGA are likely to experience high or very high levels of psychological distress compared with Tasmania overall.

### PEOPLE WITH HIGH OR VERY HIGH LEVELS OF PSYCHOLOGICAL DISTRESS

Psychological distress is a term used to describe unpleasant feelings or emotions that can influence how we function in daily life.

## Health care

### Immunisations

Ninety-four per cent (94%) of children in the Kingborough LGA are fully immunised by the age of five, which is lower than the rate for Tasmania.

### GP and emergency department encounters

In 2022, 83% of people from the Kingborough LGA visited a general practitioner for their own health in the previous twelve months\*.

On average each year during 2021-2023, 4,548 individuals from the Kingborough LGA visited an emergency department (111 people per 1,000 population<sup>^</sup>), with an average of 8,007 ED presentations per year (196 ED presentations per 1,000 population<sup>^</sup>).

<sup>^</sup>Estimated population for June 2022=40,937

Sources: Psychological distress and GP encounters: Tasmanian Population Health Survey 2022 Local Government Areas (LGA) Supplementary Data Tables.

Immunisations: Primary Health Information Development Unit, Social Health Atlas of Australia: Local Government Areas; Compiled based on data provided by Australian Childhood Immunisation Register, Medicare Australia, 2021.

Emergency department encounters: Department of Health and Human Services, Health Central Data Warehouse, Tasmania. Analysed by Primary Health Tasmania; accessed March 2025.

\*Individual totals may be higher due to patients potentially visiting more than one practice outside an LGA area or possible de-identification linkage errors from patient administration extraction software.

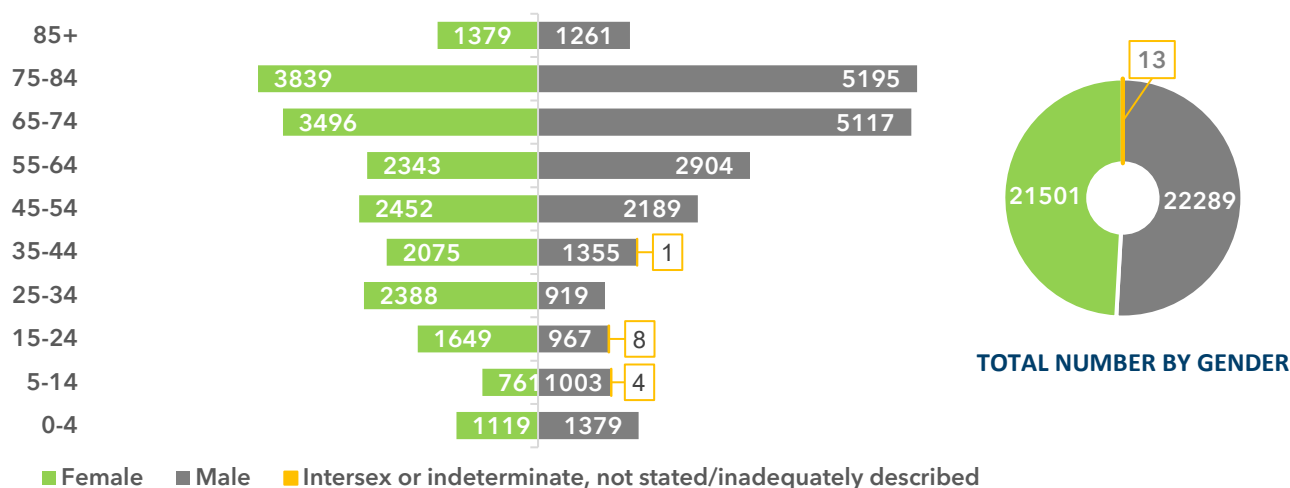

# Health outcomes

## Public hospital admissions

During the five years from 2019-20 to 2023-24 there were 43,803 admissions to Tasmanian public hospitals from the Kingborough LGA area, with 18,710 overnight stays.

### NUMBER OF PUBLIC HOSPITAL ADMISSIONS BY AGE GROUP AND GENDER 2019-20 TO 2023-24

TOP 10 PRIMARY HOSPITAL DIAGNOSIS <sup>*A</sup>	TOP 10 CHARLSON COMORBIDITIES <sup>AA</sup>	TOP 10 POTENTIALLY PREVENTABLE HOSPITALISATIONS
Care involving dialysis	Renal disease	Diabetes complications
Pain in throat and chest	Any malignancy, including lymphoma and leukaemia, except malignant neoplasm of skin	Cellulitis
Liveborn infants according to place of birth	Cerebrovascular disease	Convulsions epilepsy
Single spontaneous delivery	Chronic pulmonary disease	Urinary tract infections
Adjustment and management of drug delivery or implanted device	Congestive heart failure n	Asthma
Depressive episode	Myocardial infraction	Type 2 diabetes
Abdominal and pelvic pain	Diabetes with chronic complicatio	Congestive heart failure
Other cataract	Metastatic tumour	Iron deficiency anaemia
Problems related to medical facilities and other health care	Dementia	Chronic obstructive pulmonary disease
Crohn's disease (regional enteritis)	Rheumatic disease	Ear, nose and throat infections

<sup>\*</sup>Excludes diagnoses coded as "persons encountering health services in other circumstances" and "other medical care" which cover a wide range of diverse categories and are as such less useful in understanding reasons for hospitalisations.

# Health outcomes

^The *primary hospital diagnosis* is the diagnosis established after study (for example, at the completion of the episode of care) to be chiefly responsible for causing the episode of admitted patient care. It is essentially the main reason someone needed to be admitted to hospital.

^^Patients admitted to hospital often have other comorbid conditions, which may or may not be related to their diagnosis. *The Charlson Comorbidities Index* classifies 17 comorbid conditions which may influence mortality risk.

## Causes of death

During 2018-2022 coronary heart disease (11%), dementia including Alzheimer disease (9%), cerebrovascular disease (6%), chronic obstructive pulmonary disease (4%) and lung cancer (4%), were the leading causes of the 1,362 deaths in the Kingborough LGA area. The age standardised death rate in 2022 was 486 per 100,000 compared with the overall age standardised rate of 683 for Tasmania.
