

INVITATION

Early detection of breast cancer – the role of the GP

This session will provide an update for general practitioners and practice nurses on the importance of early detection of breast cancer, optimal referral pathways and surgery/treatment options following diagnosis.

Learning outcomes:

- Describe the benefits of early detection in breast cancer for your patients
- Describe the correct referral pathway for your patient
- Explain different breast pathologies and surgery/treatment choices
- Describe the role of breast density in risk factors for breast cancer

Application to the RACGP has been made for 4 CPD points and is pending approval.

How to RSVP

Register online: **CLICK HERE** and complete the registration details.

Online registration is confirmed immediately in our booking system and is our preferred method of RSVP. Once registered, if you find you cannot attend please call to cancel.
