

# INVITATION

## GP networking event: Redesign of Hospital Discharge (REHDI) project

This interactive workshop is seeking input from GPs to provide information to support the development in the Redesign of Hospital Discharge (REHDI) project.

The project is funded until December 2019 to develop a THS statewide discharge model project which aims to ensure timely discharge of patients back to community or aged care, who are appropriately prepared and supported for discharge.

This session will focus on:

- understanding the blocks and barriers in the current referral process for general practice
- discussing referral acceptance and intake processes and systems from general practice to the hospital
- discussing what is required for timely discharges back to general practice

### How to RSVP

Register online: **CLICK HERE** and complete the registration details.

Online registration is confirmed immediately in our booking system and is our preferred method of RSVP. Once registered, if you find you cannot attend please call to cancel.
