

# Interactive workshops for My Health Record implementation

The My Health Record is designed to equip pharmacists with the additional information to provide greater patient care. The My Health Record opt-out period is now complete. As at 27 January 2019, 84% of pharmacies were registered for the My Health Record system and of those approximately 51% are uploading dispense records.

Attend PSA hosted interactive My Health Record workshops to:

- Engage with Digital Health Leaders to explore how to overcome potential barriers to successfully implement My Health Record (MHR) in your pharmacy
- Specialist workshops for **accredited pharmacists**, focusing on connecting with the MHR system and embedding its use in regular practice
- Learn evidence-based strategies for practice change

## FREE Face-to-face workshops
